

Instruction V11 DGS

FOR VOLVO CARS MANUFACTURING – INSTRUCTION FOR V11 DGS

October 2023

Dangerous goods packaging for products without or with small projection hazard
Certificate NET8509A

The following instructions are valid for the V11 Quickbox DGS used for overseas shipping where it is mandatory to use according to the VOLVO CARS PACKAGING REQUIREMENT.

Maximum unit load per Quickbox is 15 kg.

Mandatory:

- To use EMB153 for pallet label.
- The correct pallet V8 Art.No 2075027
(No other pallet is allowed to use!)
- Always fill up with a full layer of boxes to make a complete layer. If necessary fill up with empty boxes.
- Maximum layers of boxes are 4 on each pallet.
- Use top lid and two straps as shown in the instruction.
- Do not use stretch film, use 2 straps on the longside only.

V11

Dangerous goods packaging for products without or with small projection hazard

Packaging suitable for products without risk for projection/movement outside a radius of 4 meters when activated by heat or electrically activated.

Example: Seatbelts, Side-, or inflatable curtain airbag modules or other small pyrotechnic safety devices with low projection hazard when activated in unpackaged condition.

To use and mark this packaging for dangerous goods UN3268 and UN0503, SAFETY DEVICES, division 9, and UN 3480, UN3481, UN3090 og UN3091, Lithium ion batteries, it is required to perform a successful UN Test Series 6(c) bonfire test with the product as offered for transport.
